DETAILED ACTION

This final office action is in response to communications filed on 8/18/03.

Claims 1-29 and 31-36 are presented for examination.

Response to Arguments

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Applicant's arguments filed on 7/11/03 have been fully considered but they are not persuasive.

Regarding claims 1-29 and 31-36, the applicant argues that Noble does not disclose or suggest "a controller to transition a component, in response to the power management event, to a reduced activity state, a core component clock remains active during the reduced activity state, the controller to change a first and second setting of the component from a first performance mode to a second performance mode." However, Noble teaches a system, which detects a power management event [desirability of transitioning into a low power mode] and transitioning a component [processor] into a reduced activity state [low power mode, column 7, line 62 – column 8, line 18]. In the reduced activity state, the core clock frequency of the component is reduced, not turned off. Therefore the core clock does, in fact, remain active during the reduced activity state. Noble does not specifically teach a controller for transitioning the component from a first performance mode to a second performance mode. However, it is inherent in the teachings of Noble that the system must have a controller like device in order to control performance mode transitions of the component, in response to a power management event.

Art Unit: 2185

The rejections to claims 1-29 and 31-36 are respectfully maintained and incorporated by reference as set forth in the last office action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul B Yanchus whose telephone number is (703) 305-8022. The examiner can normally be reached on Mon-Fri 8:00-5:30 (Every other Friday off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Lee can be reached on (703) 305-9717. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
